If Break (BL), Safe working load (SWL) or Working load limit (WLL) are shown:

This is a guide only. (Do not use for lifting unless it is a certified lifting product)

### SWIVEL EYE TO JAW

Eye and jaw swivels are used to connect items that require a swivelling joint to prevent twisting. For example, twisting of gym equipment like punch bags or chain in boats, or suspended chairs. Manufactured in marine grade stainless. One side of the swivel has a removable pin, whilst the other side is a dee shape. If both sides of the swivel require opening, then choose the Jaw and Jaw swivel.

MATERIAL TYPE	A4 STAINLESS
FINISH	POLISHED

### ADVANTAGES

- Strong & durable
- Anti Twisting
- A4 Stainless steel
