If Break (BL), Safe working load (SWL) or Working load limit (WLL) are shown:
This is a guide only. (Do not use for lifting unless it is a certified lifting product)

BLACK COATED QUICK LINK

Quick Links can be used as chain connectors, repair links, fixed climbing points and net fixings. They are equally useful in many other applications. They are preferred over snap hooks in multi-directional load situations. This black coated variety can be used in areas where light reflection is to be kept to a minimum such as theatre or military applications.
