SNAP SHACKLE SWIVEL JAW HEAD

A Snap Shackle is a fast application fastener great in temporary use, or when moved or replaced often. It uses a spring activated locking mechanism to close a hinged shackle, which means it can be used single-handedly, and can be unfastened under load. It is an extremely useful shackle but should be used with the following caution: It is not as secure as other shackles, due the nature of its opening. Also, when being used to release a significant load, the pin may be hard to release, causing the pin assembly or split ring to fail. Available in 2 sizes. Made from 316 Stainless Steel.

MATERIAL TYPE	316 STAINLESS
FINISH	POLISHED

ADVANTAGES

- Strong & durable
- Quick release pin
- A4 Stainless steel
